4		
5		

1. Introduction

Briefly introduce the selected application and explain why it is important.

_____

__

2. Problem Statement

Describe the real-world problem your case study aims to solve.

_____

__

3. Objectives

Write 3–4 clear objectives of the case study.

_____

__

4. Existing System

Describe how the problem is currently handled and mention limitations.

_____

__

5. Proposed Solution / Methodology

Explain your proposed solution step by step. Include a simple workflow or block diagram.

---

6. Tools and Technologies

List programming languages, datasets, NLP/AI algorithms, libraries or platforms relevant to the case study.

---

7. Results / Expected Outcome

Provide sample input/output, screenshots if implemented, or explain expected results.

---

8. Conclusion

Summarize what you learned and how the solution can help.

---

9. References

List websites, books, articles, or datasets consulted.

Submission Guidelines

Length: 5–8 pages | A4 | Times New Roman 12 pt | 1.5 line spacing | Include group details and diagrams where relevant.
